CONTENTS

NUMBER 1

E. Sakurai, S. Yamasaki, H. Niwa, S. S. Jossan, J. Hallmann and L. Oreland	1	Relation between serotonin and dopamine uptake rates, transmitter concentrations and monoamine oxidase activities in various regions of the rat brain
M. B. H. Youdim, M. Gavish, S. Marmur and M. Aviram	11	The inhibition of platelet 5-HT release by 5-HT_{1A} agonists and the binding of [^{3}H]8-OH-DPAT to platelet membranes
A. Adell, C. García-Marquez, A. Armario and E. Gelpí	19	Effects of chronic stress on serotonin and noradrenaline in the rat brain
K. Drescher, H. Fink, L. Hetey and T. Ott	27	Dopaminergic–serotonergic interactions in the medial raphe nucleus could be involved in the mediation of the effects of sulpiride
F. Karege and J.-M. Gaillard	37	Metabolism time-course of monoamines in rat brain after low dose of clonidine
W. Kostowski, P. Krząścik and O. Puciłowski	49	Effect of calcium channel inhibitors on D_1 receptor-mediated responses: SKF 38393-induced grooming and SCH 23390-induced catalepsy in rats
F. Martin, G. Rozas, J. Miguez and M. Aldegunde	57	Plasma serotonin: factors affecting its levels
J. Schmidt and U. Bucher	63	Influence of nootropic drugs on spontaneous and apomorphine-induced locomotor activity in rats
P. Herregodts, B. Velkeniers, G. Schröder, G. Ebinger, Y. Michotte, L. Vanhaelst and E. Hooghe-Peters	71	Analysis by HPLC with electrochemical detection: monoamines and their major metabolites in fetal and post-natal rat brain
R. Aguilar, L. Pinilla, D. González, F. López, C. Bellido and E. Aguilar	81	Participation of the serotoninergic system in the onset of puberty in female rats
M. G. P. Feenstra, J. J. van Heerikhuize, H. van Galen, K. Kramer and A. Bast	89	Short-term effects of intraventricular 6-hydroxydopamine on rat hippocampal beta-adrenergic receptors
I. P. Anokhina, L. N. Ovchinnikova, N. A. Khristolyubova and V. Z. Gorkin	95	Evidence for impairment of liver monoamine oxidase properties in offspring of alcoholized rats

NUMBER 2

H. Ollat, H. Parvez and S. Parvez	107	Membrane binding sites of antidepressants
J. R. Arnold, R. M. Hysmith and P. J. Boor	127	The ultracytochemical demonstration of extramitochondrial monoamine oxidase activity
J. M. Monti, G. Piñeyro, C. Orellana, M. Boussard, H. Jantos, P. Labraga, S. Olivera and F. Alvariño	145	5-HT receptor agonists 1-(2,5-dimethoxy-4-iodophenyl)-2-aminopropane (DOI) and 8-OH-DPAT increase wakefulness in the rat
S. K. Ray and M. K. Poddar	153	Role of central serotonin in caffeine-induced stimulation of locomotor activity in rat
M. Sothmann, T. J. Woulfe, J. A. Blaney and S. Donahue-Fuhrman	165	Circulating free and sulfoconjugated catecholamine adaptations to exercise training in humans

M. Segawa, H. Saito and N. Nishiyama — 171 — Alterations in choline acetyltransferase and tyrosine hydroxylase activities of various brain areas after the acquisition of active avoidance tasks in mice

M. Segawa, H. Saito and N. Nishiyama — 181 — Alterations in acetylcholine content and muscarinic cholinergic binding of various brain areas after the acquisition of active avoidance tasks in mice

M. Segawa, H. Saito and N. Nishiyama — 191 — Alterations in choline acetyltransferase and tyrosine hydroxylase activities of various brain regions after passive avoidance performance in mice

M. Segawa, H. Saito and N. Nishiyama — 199 — Alterations in acetylcholine content and muscarinic cholinergic binding of various brain regions after performance of passive avoidance behaviors in mice

NUMBER 3

T. Hibino, K. Shimpo, K. Kawai, T. Chihara, K. Maruta, M. Arai, T. Nagatsu and K. Fujita — 209 — Polyamine levels of urine and erythrocytes on inhibition of DMBA-induced oral carcinogenesis by topical beta-carotene

R. W. Fuller, C. M. Gust and H. D. Snoddy — 217 — Tefludazine, a potent antagonist of corticosterone elevation by pergolide and quipazine in rats

K. Yamada, N. Karasawa, T. Fujii, G. Isomura, I. Takagi, M. Sakai and I. Nagatsu — 223 — Immunocytochemical localization of amines and peptides in adrenal chromaffin cells of the house shrew (*Suncus murinus*)

F. Tison, M. Geffard and P. Henry — 235 — Tryptamine is found closely associated to the serotoninergic pathways when using an immunohistochemical method of detection in the rat central nervous system

K. Blum, A. H. Briggs, L. Delallo, C. William-Hall and S. H. Parvez — 249 — Potentiation of the inhibitory action of methionine-enkephalamide by low ethanol concentrations on mouse vas deferens

M. Kuroda, M. Sugi, T. Ikeda, M. Fujimoto, K. Yokomori, J. Amano and M. Yoshioka — 257 — Enzyme immunoassay of vanilmandelic acid (VMA) in urine

M. G. P. Feenstra, T. J. A. M. van der Velden and O. R. Hommes — 265 — Separation of dopamine and serotonin from their formaldehyde-derived tetrahydroisoquinoline and tetrahydro-beta-carboline condensation products on different reversed-phase LC columns

E. Bien, G. Skorka, H. Rex and D. Kästner — 275 — Glutathione level in developing rat brain

S. Staeck, S. Staak, N. Popov, R. Jork and H. Matthies — 283 — Dopamine-mediated stimulation of hippocampal glycoprotein fucosylation is enhanced by calmidazolium but prevented by polymyxin B

M. E. Otero Losada — 289 — GABAergic influence on serotonergic function

L. R. Meyerson, H. Park, C. E. Rauh and J. Coupet — 299 — 5-HT_{1A} agonist effects on muscular contraction, acetylcholine release and adenylate cyclase in the guinea pig ileum

NUMBER 4

M. Xu, T. Kato, K. Natori and T. Irie — 307 — Excitatory action of SM-10888 on *in vivo* cortical dopamine release is blocked by M1 muscarinic receptor antagonist

C. Y. Cheung — 315 — Prolactin stimulates adrenal medullary catecholamine release and tyrosine hydroxylase activity in the ovine fetus

A. Aoba, H. Takagi, N. Yamaguchi, T. Tsuneizumi, T. Chishima, T. Sakai, K. Negishi, Y. Morokawa and K. Hasegawa	323	The effects of indeloxazine on cerebrospinal fluid monoamines and their metabolites in senile dementia of Alzheimer's type
D. D. Schoepp and C. C. Hillman Jr	331	Developmental and pharmacological characterization of quisqualate, ibotenate, and *trans*-1-amino-1,3-cyclopentanedicarboxylic acid stimulations of phosphoinositide hydrolysis in rat cortical brain slices
B. D. Sloley and A. V. Juorio	341	Biogenic amines in the nervous and other tissues of several species of starfish: presence of relatively high levels of tryptamine and low levels of 5-hydroxytryptamine
H. Okamura, K. Kitahama, B. Raynaud, C. Borri-Voltattorni, I. Nagatsu and M. Weber	351	Immunocytochemistry of aromatic L-amino acid decarboxylase in the rat preoptic area and anterior hypothalamus, with special reference to tyrosine hydroxylase immunocytochemistry
T. Kumazawa, H. Seno and O. Suzuki	363	Deacetylation of acetylputrescine in rat tissues
M. Yoshioka, N. Narai, N. Kawai, M. Numata and T. Nakajima	375	A new insecticide, clavamine, from venom of a spider, *Nephila clavata*—I. Purification and identification of the structure
E. Adeghate and T. Donáth	385	Intramural serotonin immunoreactive cells in normal and transplanted pancreatic tissue
B. A. McMillen, S. M. Scott and H. L. Williams	391	Comparative neuropharmacology of ipsapirone, fluprazine and (±)-8-hydroxy-dipropylaminotetralin

NUMBER 5

H. Ahlman, A. McRae, S. Jansson, J. Mölne and A. Dahlström	399	Immunocytochemical and biochemical evidence of catecholamine secretion from human midgut carcinoid tumour cells in culture
I. S. Zavodskaya, V. V. Elseev, V. P. Novikov, L. A. Astakhova, T. N. Nilova, I. B. Krylova, G. M. Poltavchenko and V. V. Slobodskaya	409	The effect of adenosine on the development mechanism of neurogeneous myocardial damage
E. Oelssner, L. Hetey and T. Ott	417	Influence of cholecystokinin analogues on CCK-induced alterations of dopamine release and dopamine uptake in the nucleus accumbens of rats
M. G. P. Feenstra, A. J. Voogel, A. Kalsbeek and H. Rollema	425	Insensitivity of early postnatal rat brain dopaminergic systems to 1-methyl-4-phenylpyridinium ion (MPP^+)
M. Garty, A. Deka-Starosta, R. Stull, I. J. Kopin and D. S. Goldstein	435	Effects of general anesthetics on plasma levels of catechols in intact and in adrenal-demedullated rats
K. Szemeredi, G. Bagdy, R. Stull, I. J. Kopin and D. S. Goldstein	445	Cortisol and alpha-2 adrenergic regulation of sympathoneural activity
S. K. Mahata, K. De and A. Ghosh	455	Effect of insulin on adrenomedullary catecholamine content and blood glucose level in normal and reserpinized avian species
S. Bernath and M. J. Zigmond	465	Dopamine enhances striatal GABA release via an influence on the GABA uptake system
J. S. L. Mok, J. S. Hutchinson and Kim Ping Wong	475	Brain phenolsulfotransferase (PST) activity in spontaneously hypertensive and normotensive rats

K. Miura, M. Sakai, K. Komori, S. Furune, K. Watanabe and I. Nagatsu — 483 — Semiquantitative immunohistochemical study on normal development of nigrostriatal dopaminergic neurons in the mouse brain

K. Komori, K. Miura, T. Takeuchi, M. Sakai, N. Karasawa and I. Nagatsu — 493 — Transient expression of phenylethanolamine-*N*-methyltransferase immunoreactivity in some neurons of the mouse caudate nucleus during postnatal development

S. Biswas and M. K. Poddar — 505 — Effect of lower environmental temperature on diazepam-induced changes in GABA metabolism of mammalian brain regions

H. Shimizu, Y. Uehara, Y. Shimomura, M. Negishi, S. Takahashi, I. Kobayashi and S. Kobayashi — 517 — Effects of recombinant human interleukin-1 beta on hypothalamic monoamine metabolism of rats

NUMBER 6

T. Endo, M. Minami, Y. Monma, M. Yoshioka, H. Saito, J. Kinami, Y. Toshimitsu and H. Parvez — 525 — Effect of GR38032F on cisplatin- and cyclophosphamide-induced emesis in the ferret

H. Ozawa, M. M. Rasenick and T. Saito — 535 — Effect of chronic antidepressant administration on beta-adrenergic receptor–GTP binding protein–adenylate cyclase coupling

A. Stenström and I. Lundquist — 547 — Monoamine oxidase (MAO) A and B in pancreatic islets from the mouse

G. Delbarre, B. Delbarre, F. Calinon, A. Ferger and C. Loiret — 557 — Metabolism of monoamines and indoleamines in gerbil cerebral ischemia

B. A. McMillen and H. L. Williams — 569 — Effects of chronic ipsapirone on rat brain monoaminergic receptors and responses to chronic antipsychotic treatment

E. M. Krupitsky, A. Ya. Grinenko, G. F. Karandashova, T. N. Berkaliev, K. A. Moshkov and Yu. S. Borodkin — 577 — Metabolism of biogenic amines induced by alcoholism narcopsychotherapy with ketamine administration

T. Obata and Y. Yamanaka — 583 — Separation of two or more distinct amine oxidases released into plasma from rats treated with the hepatotoxin allyl formate

K.-Y. Kubo, M. Onozuka, N. Karasawa, I. Nagatsu and S. Deura — 591 — Immunohistocytochemical and electrophysiological studies on the neuronal reorganization in the cerebellum of jaundiced Gunn rat

P. C. Waldmeier — 603 — Weak impact of GABA uptake inhibition on nigrostriatal dopamine function

C. Chang, K. Kumami and M. Spatz — 613 — Cerebral ischemia: synaptosomal uptake and metabolism of tryptophan to 5-hydroxyindoles

P. K. Opstad — 625 — Adrenergic desensitization and alterations in free and conjugated catechoiamines during prolonged strain, sleep and energy deficiency

L. Čičin-Šain, D. Orešković, S. Perović, B. Jernej and S. Iskrić — 641 — Determination of serotonin in peripheral rat tissues by ion-exchange chromatography–fluorometry. Validation by high performance liquid chromatography with electrochemical detection

R. Lewinsohn — 651 — Benzylamine-oxidizing enzymes in human pregnancy fluids and pharyngeal aspirate of the newborn: nature and origins
